Declaration

I certify that the project work named "Online Job Portal with Resume Builder & Recruiter Dashboard" is my own original work that I have undertaken in my academic project. The project work described in this report is my own work, and has been carried out under the guidance and supervision of my faculty advisor.

This work has not been plagiarized from any other work and has not been submitted in either its entirety or any part thereof, for any academic or professional certification. The concepts, design and implementation incorporated in the project are the outcome of my personal knowledge and application of the subject.

When referencing work already referenced in any form of system or research material or web, due credit has been provided. I have made all reasonable efforts to ensure that this work does not infringe any copyright, intellectual property rights.

I declare the work presented in this project report is my own and is entirely original. I am solely responsible for any errors, and omissions.

Name: Sachin Kumar Singh

Registration Number: 12401390

Roll Number: 29

Course: BSc (information technology)

Date: 30/04/2026

Acknowledgement

I would like to acknowledge my project supervisor and all the faculties of Lovely Professional University for their support and guidance to complete this project. Their guidance and knowledge immensely helped in the completion of this project.

I also would convey my thanks to my training and placement agency for their motivation and for giving me opportunity and allowing me to use resources to present this project to them, which has benefited me with extensive knowledge and experience.

1.Organization Overview

1.1About Lovely Professional University

Lovely Professional University is one of the biggest private universities of India with good academic set-up, and an emphasis on industry. It offers a platform for students to study and practice using real scenarios.

The university is focused on project-based learning. LPU also conducts internships, training and exposure. This ensures they get technical and soft skills.

1.2About Training Organization / Company

The organization plays a crucial role in the development of practical skills. It provides a link between theoretical study and the industry. It provides hands-on using real tools and solving real problems.

organization provides:

- ✓ Hands-on development experience
- ✓ Exposure to modern technologies
- ✓ Guidance from mentors

1.3 Industry Overview (Online Job Market)

The online job market has evolved significantly with platforms like [LinkedIn](#) and [Naukri.com](#). Earlier, job searching was slow. Manual. Limited.

Now everything is digital. Fast. Competitive.

Companies can post jobs instantly. Candidates apply in seconds. But this also creates new problems. Too many applications. Hard to filter.

The industry is moving toward automation and AI-based hiring systems. Still, there is a gap between user needs and platform efficiency.

2. Problem Profile

2.1 Introduction to the Problem

Recruitment today is not as simple as it looks. Both job seekers and recruiters face difficulties.

Job seekers struggle to find relevant jobs. Recruiters struggle to find suitable candidates.

There is a mismatch. And it slows everything down.

2.2 Need for Online Job Portal System

A centralized system is required to simplify the hiring process.

system should:

- ✓ Help users create professional resumes
- ✓ Provide relevant job opportunities
- ✓ Allow recruiters to filter candidates effectively

Existing systems exist. But they are not always efficient. Some are too complex. Some lack personalization, So yes, there is a clear need for improvement.

2.3 Scope of the Project

This project focuses on building a web-based job portal system with integrated features. system includes:

- ✓ User authentication
- ✓ Resume builder
- ✓ Job search and application
- ✓ Recruiter dashboard

The scope is limited to core functionality. But it can be extended in future.

3.Existing System Analysis

3.1Overview of Existing Platforms

Platforms like LinkedIn and Naukri.com provide large-scale job services.

They offer:

- ✓ Job listings
- ✓ Resume uploads
- ✓ Networking features

3.2Limitations of Existing Systems

Some common limitations include:

- ✓ Complex user interface
- ✓ Irrelevant job recommendations
- ✓ Limited resume building options
- ✓ Overloaded data

3.3Challenges Faced by Job Seekers & Recruiters

Job Seekers:

- ✓ Difficulty in resume creation
- ✓ Lack of job relevance
- ✓ No proper tracking system

Recruiters:

- ✓ Too many applications
- ✓ Hard to filter candidates
- ✓ Time-consuming hiring process

3.4 Proposed System Overview

The proposed system aims to solve these issues by providing a simple and efficient platform. It integrates:

- ✓ Resume builder
- ✓ Job portal
- ✓ Recruiter dashboard

4. Problem Analysis & Planning

4.1 Feasibility Study

4.1.1 Technical Feasibility

The system can be developed using modern web technologies such as JavaScript, Node.js, and MySQL.

These technologies are widely available and well-supported. So implementation is feasible.

4.1.2 Economic Feasibility

The cost of development is low. Most tools used are open-source.

No major financial investment is required. Which is good.

4.1.3 Operational Feasibility

The system is user-friendly. Users with basic knowledge can operate it easily.

So yes, it is operationally feasible.

4.2 Project Planning

4.2.1 Project Objectives

- ✓ Develop a functional job portal
- ✓ Simplify hiring process
- ✓ Provide resume building tools

4.2.2 Project Deliverables

- ✓ Working web application
- ✓ Documentation (SRS, diagrams)
- ✓ Source code

4.2.3Project Timeline / Schedule

- ✓ Week 1: Planning and design
- ✓ Week 2–3: Development
- ✓ Week 4: Testing and documentation

4.3Risk Management Plan

4.3.1Possible risks include:

- ✓ Technical issues
- ✓ Time constraints
- ✓ Integration problems

4.3.2Mitigation strategies:

- ✓ Regular testing
- ✓ Proper planning
- ✓ Backup solutions

4.4System Overview

The system is a web-based application that connects job seekers and recruiters through a centralized platform.

It provides efficient communication, data handling, and user interaction

1.Introduction

1.1 Purpose

This document provides a details description of the requirement for the **Online Portal with Resume Builder & Recruiter**.

it is intended for developers, testers, and evaluators to understand system functionality and design.

1.2 Scope

The System Is a Web Based Application That Enables:

- Job seekers to Create Resumes, Search Jobs, and Apply
- Recruiters to Post Jobs and Manage Applications

The System Improve Hiring Efficiency and Simplifies Job Searching.

1.3 Definitions

- **User:** Any person using the system
- **Job Seeker:** Candidate applying for jobs
- **Recruiter:** Employer posting jobs
- **Admin:** System manager

2. Overall Description

2.1 Product Perspective

This system is a standalone web application accessible through browsers.

2.2 Product Functions

Job Seeker:

- Register/Login
- Create and download resume
- Search jobs
- Apply for jobs
- Track application status

Recruiter:

- Register/Login
- Post job listings
- View applicants
- Accept/Reject candidates

Admin:

- Manage user
- Manage job postings

2.3 User Classes

2.4 operating environment

- **Frontend:** HTML, CSS, JavaScript

User type	Description
Job seeker	Searches and applies for jobs
Recruiter	Posts jobs and manage
Admin	Controls system

- **Backend:** Node.js/PHP/Python
- **Database:** MySQL
- **Browser:** Chrome, Edge
- **Operating System:** Windows

3. functional requirement

Authentication

- **FR1:** user can register using email and password
- **FR2:** user can login
- **FR3:** user can logout

job Seeker Features

- **FR4:** create resume
- **FR5:** edit resume
- **FR6:** search jobs
- **FR7:** apply for jobs
- **FR8:** view application status

recruiter features

- **FR9:** post job
- **FR10:** edit job posting
- **FR11:** view application
- **FR12:** accept/reject application

Admin features

- **FR13:** manage users
- **FR14:** delete job postings

4. non- functional recruitment

- **NFR1:** system should load within 2-3 seconds
- **NFR2:** data should be secure (encrypted passwords)
- **NFR3:** system should be user friendly
- **NFR4:** system should support multiple users simultaneously
- **NFR5:** system should be responsive (mobile-friendly)

5. system features

5.1 user authentication

- **Input:** email, password
- **Process:** validation + authentication
- **Output:** dashboard access

5.2 resume builder

- **Input:** skills, education, experience
- **Process:** store and format data
- **Output:** resume (PDF/Preview)

5.3 job search & apply

- **Input:** job keyword
- **Process:** fetch job listings
- **Output:** list of jobs

5.4 job posting

- **Input:** job details
- **Process:** store in database
- **Output:** job visible to seekers

5.5 application management

- Recruiter review application
- status updated(selected/rejected)

6. Database requirements

Tables:

Users table

- id
- name
- email
- password

- role

jobs table

- id
- title
- description
- recruiter_id

applications table

- id
- user_id
- job_id
- status

resume table

- id
- user_id
- skills
- education
- experience

7. External interface requirements

7.1 user interface

- login/register page
- dashboard
- job listing page
- resume builder page
- recruiter dashboard

7.2 hardware requirement

- computer/laptop
- internet connection

7.3 software requirements

- browser (chrome/edge)
- code editor (antigravity/vs code)

8. System Architecture

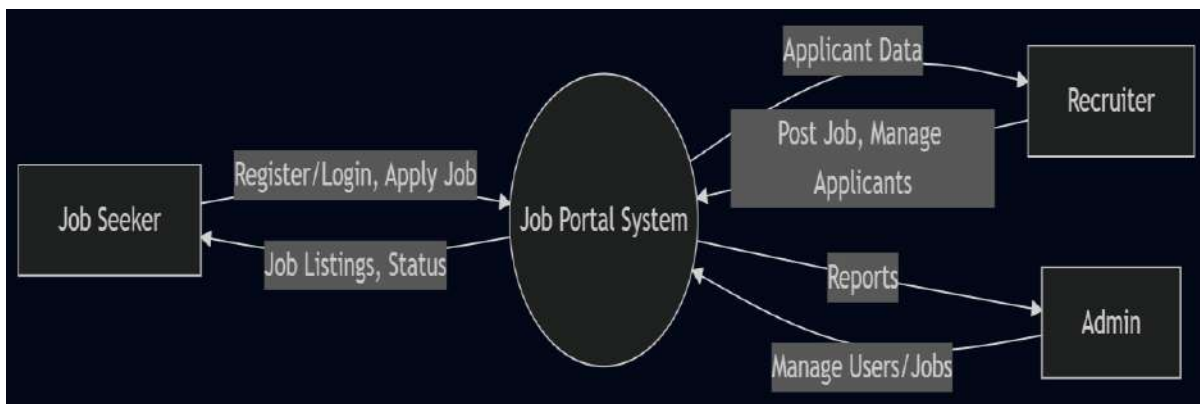

Figure 1: Context Diagram representing the overall interaction between external entities (Job Seeker, Recruiter, Admin) and the Online Job Portal System

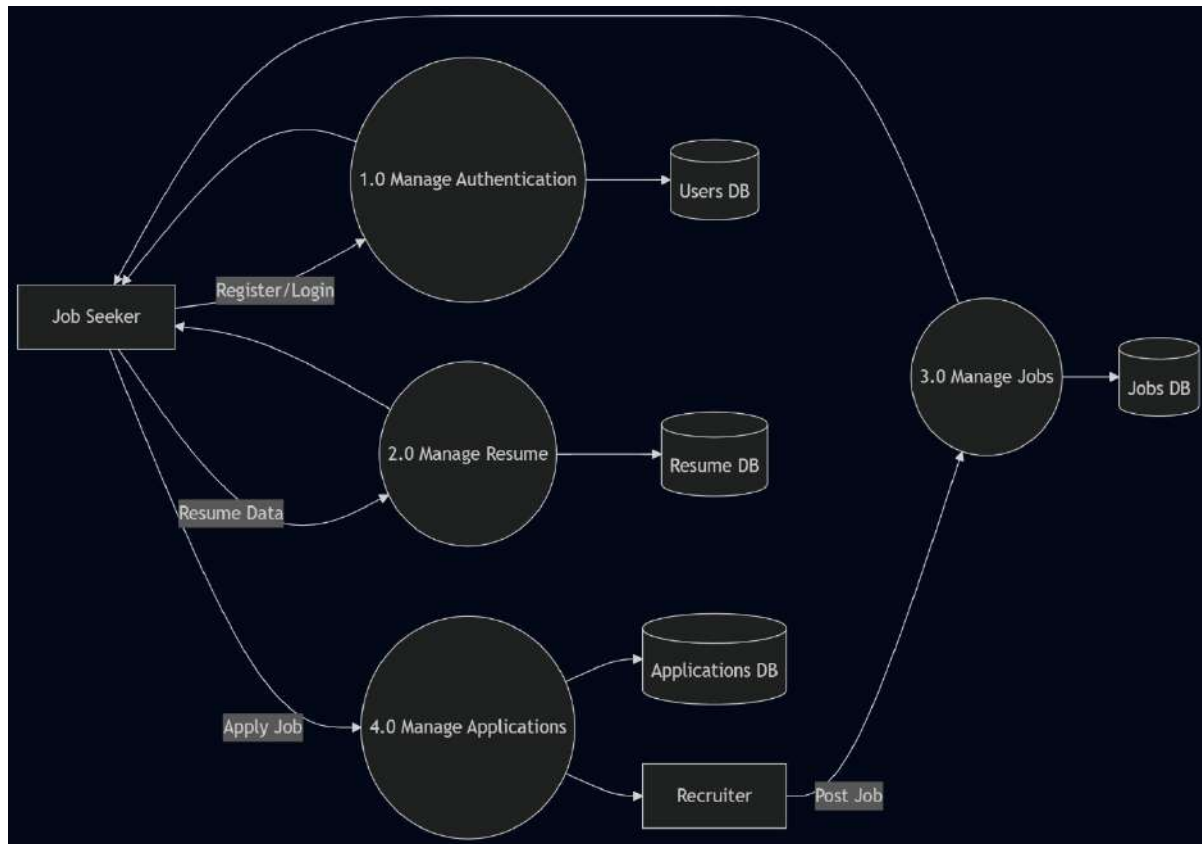

Figure 2: Level 1 Data Flow Diagram showing major processes such as authentication, resume management, job management, and application handling along with data stores

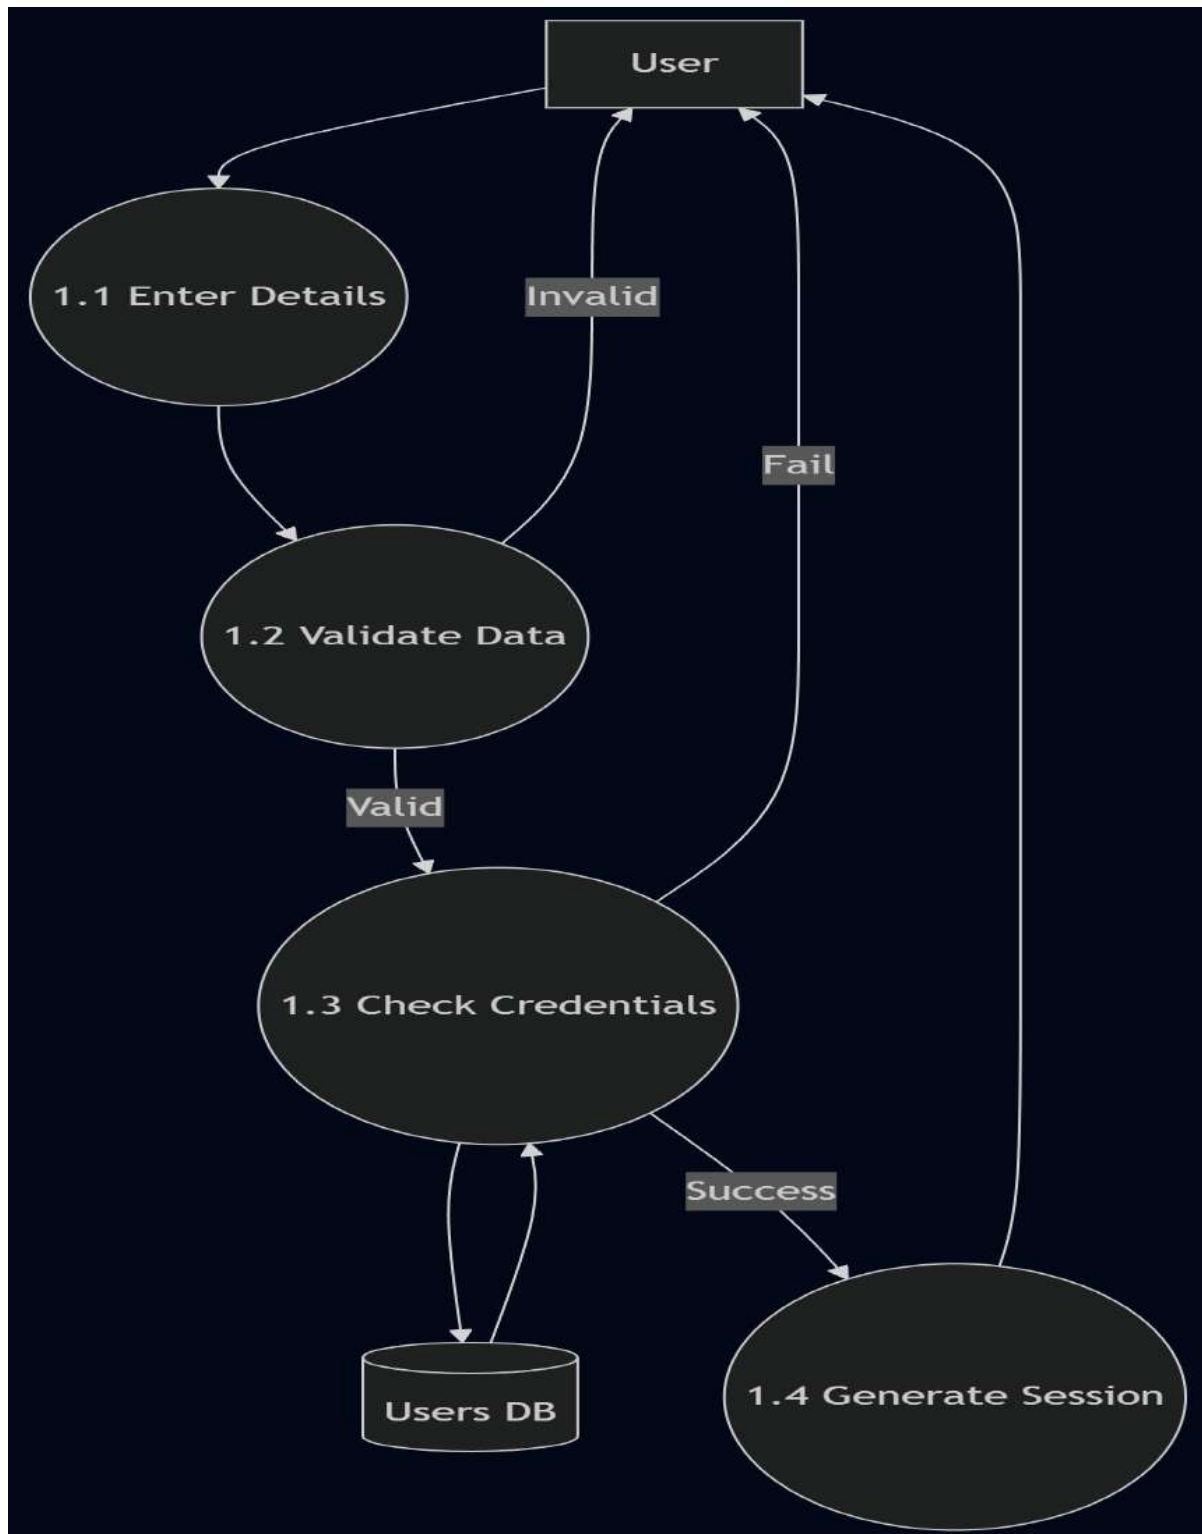

Figure 3: Level 2 Data Flow Diagram illustrating the detailed authentication process including validation, credential checking, and session generation

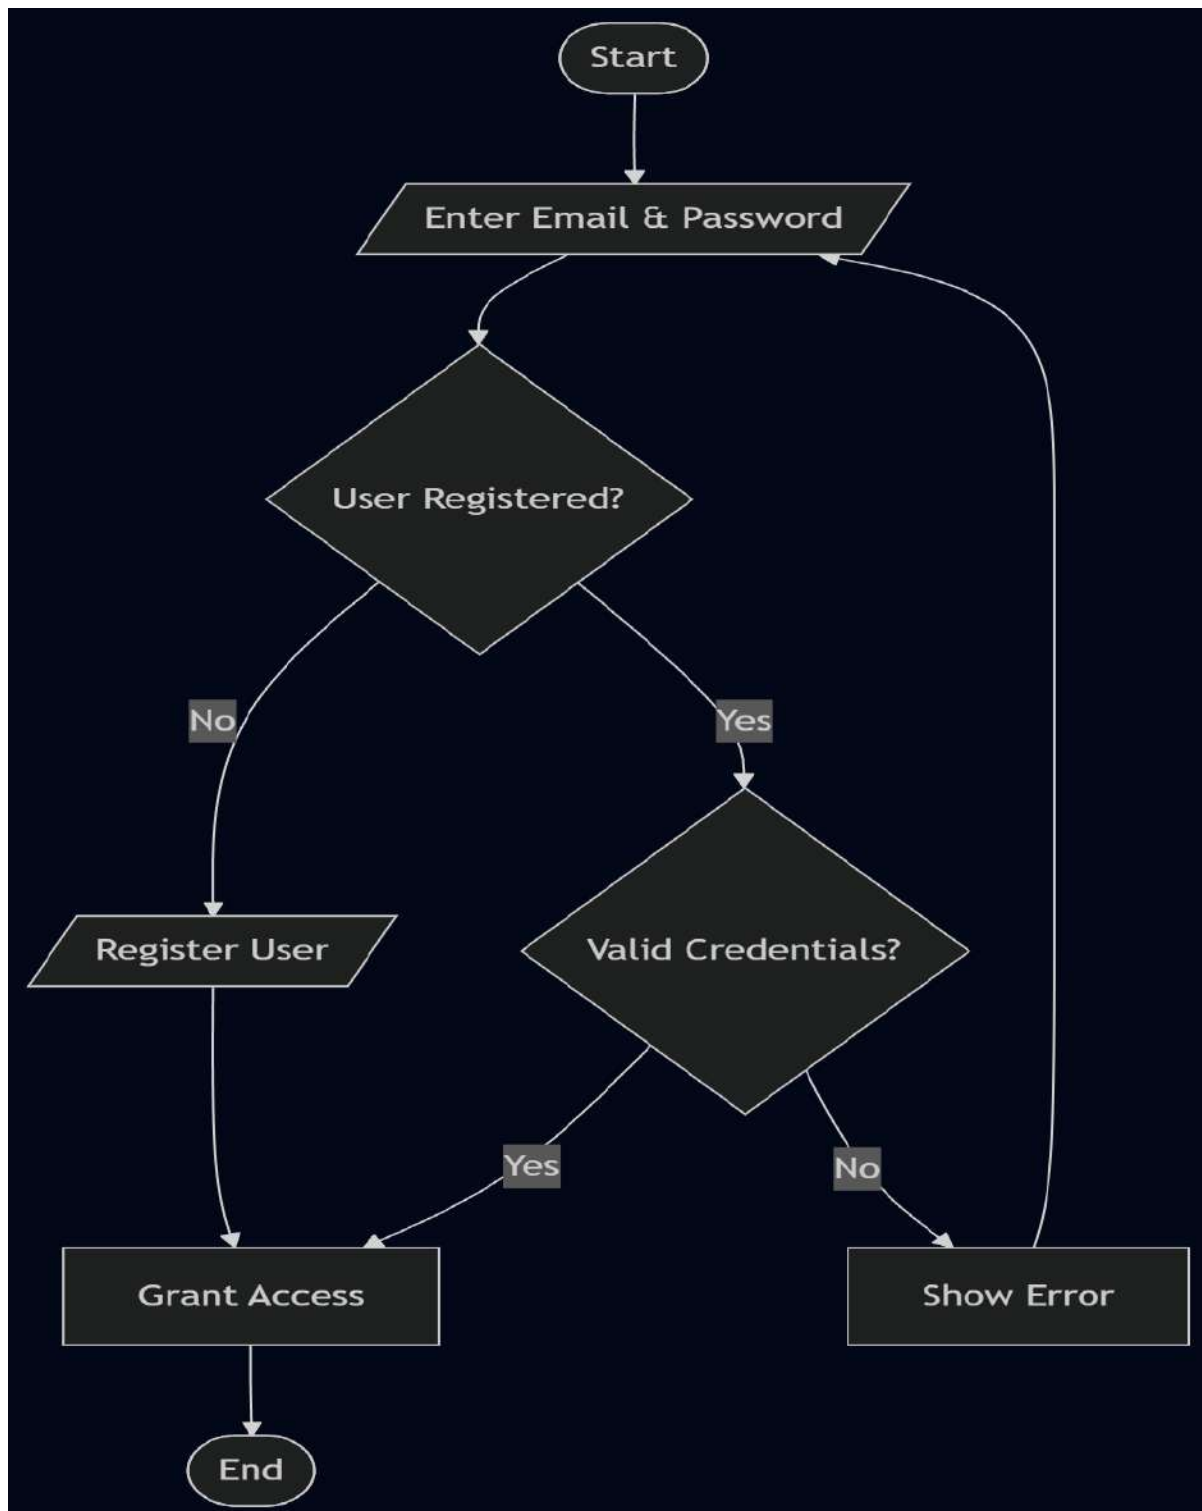

Figure 4: Flowchart representing the process of user registration and login including validation and authentication steps

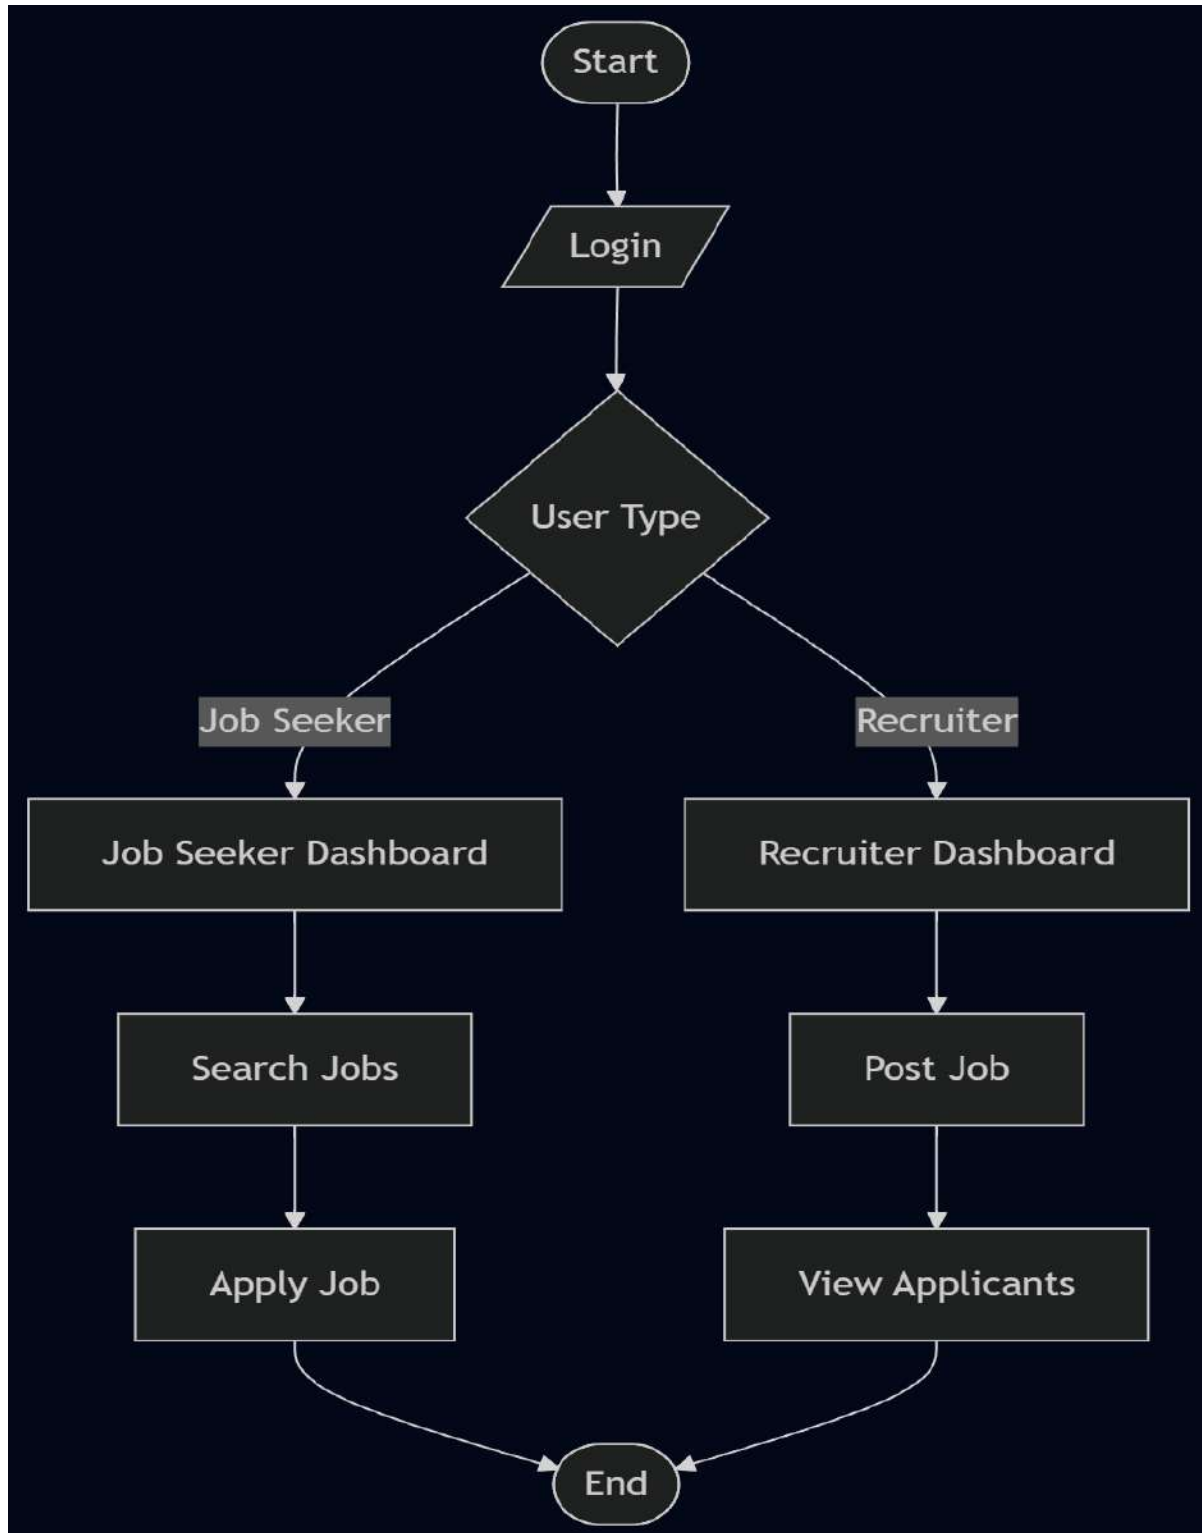

Figure 5: Flowchart illustrating the overall system workflow for job seekers and recruiters from login to task execution

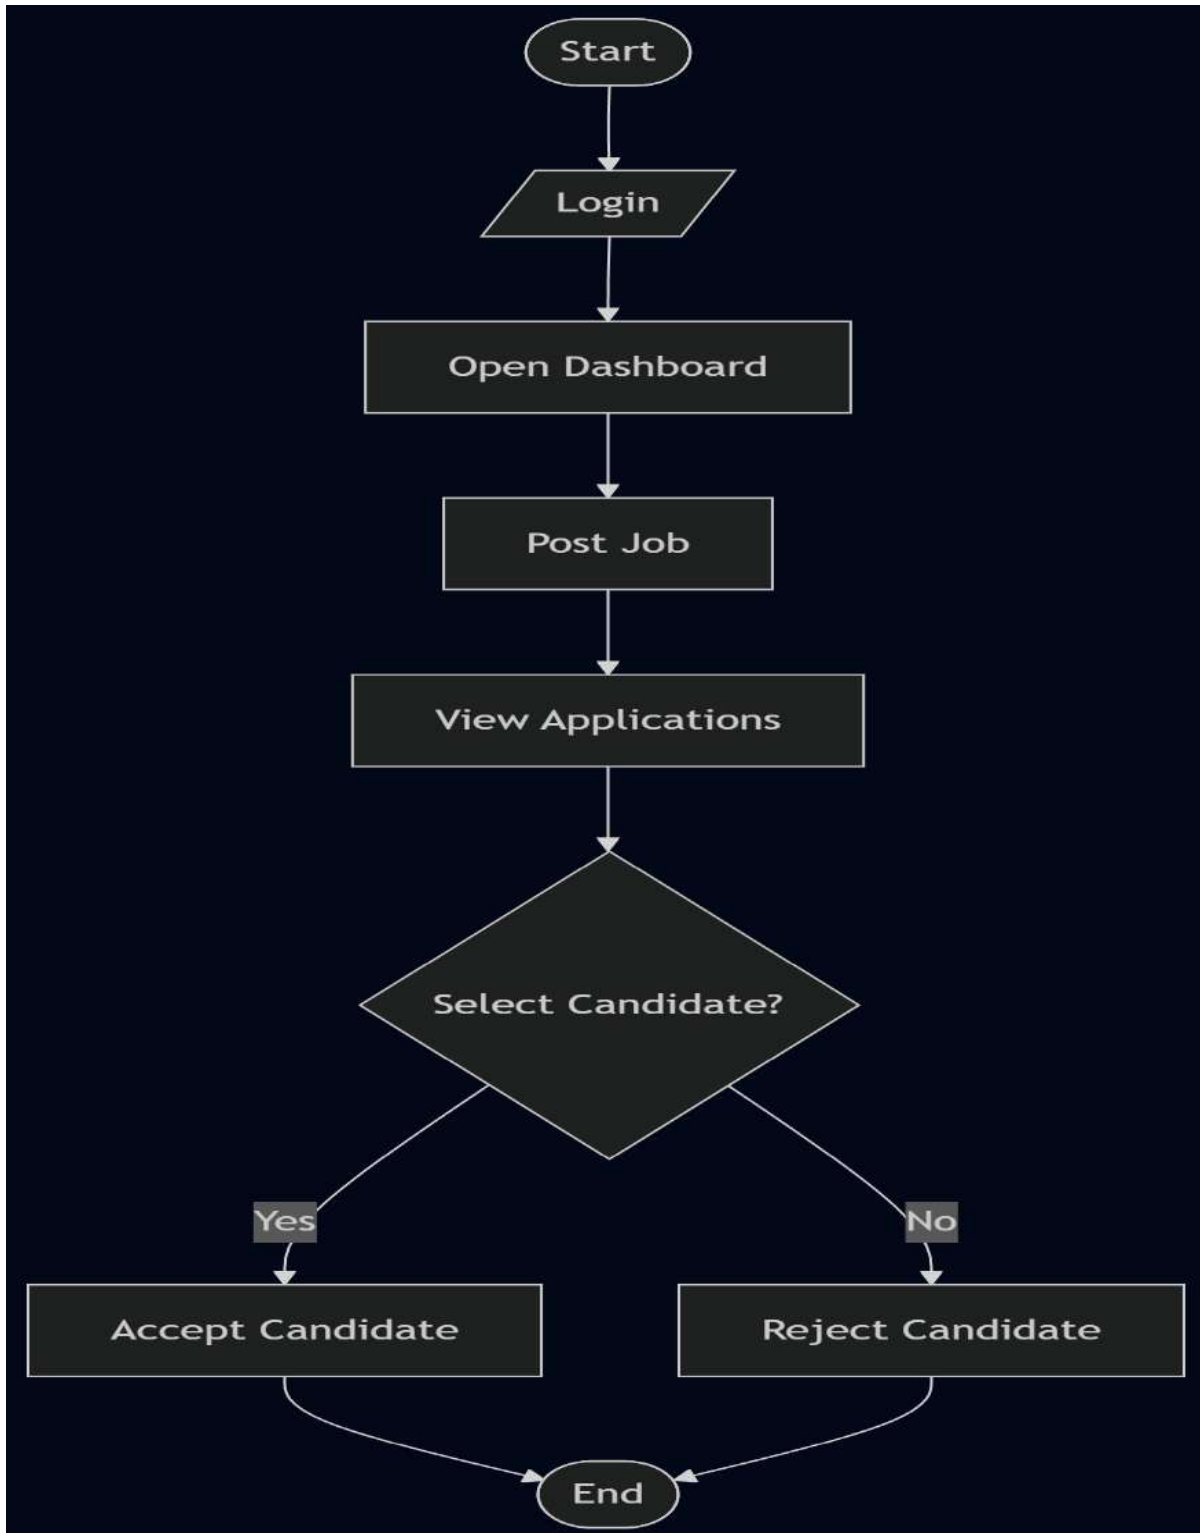

Figure 6: Flowchart showing recruiter operations including job posting, application review, and candidate selection

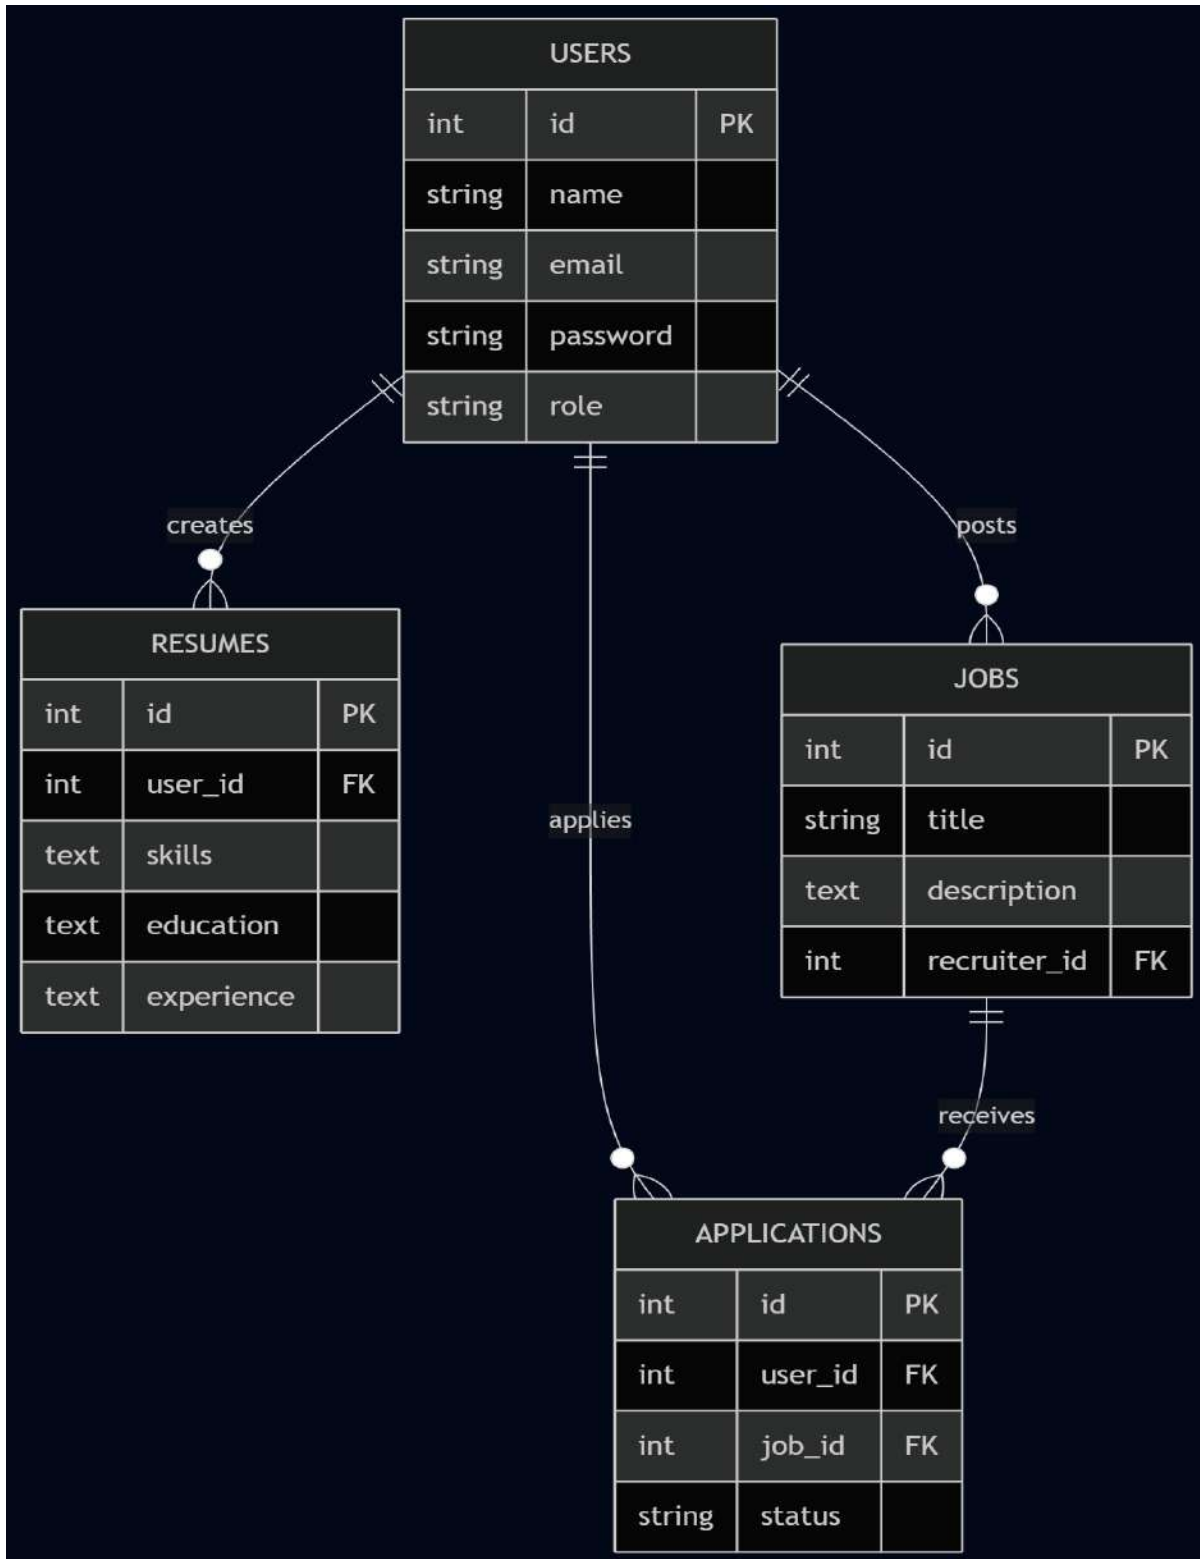

Figure 7: Entity Relationship Diagram showing entities, attributes, and relationships within the Online Job Portal system

9. Assumptions & Constraints

- Users must register before using features
- Internet connection required
- Basic system knowledge needed

10. Future Enhancements

- Ai resume suggestion
- Job recommendation system
- Email notification
- Chat system between recruiter & candidate

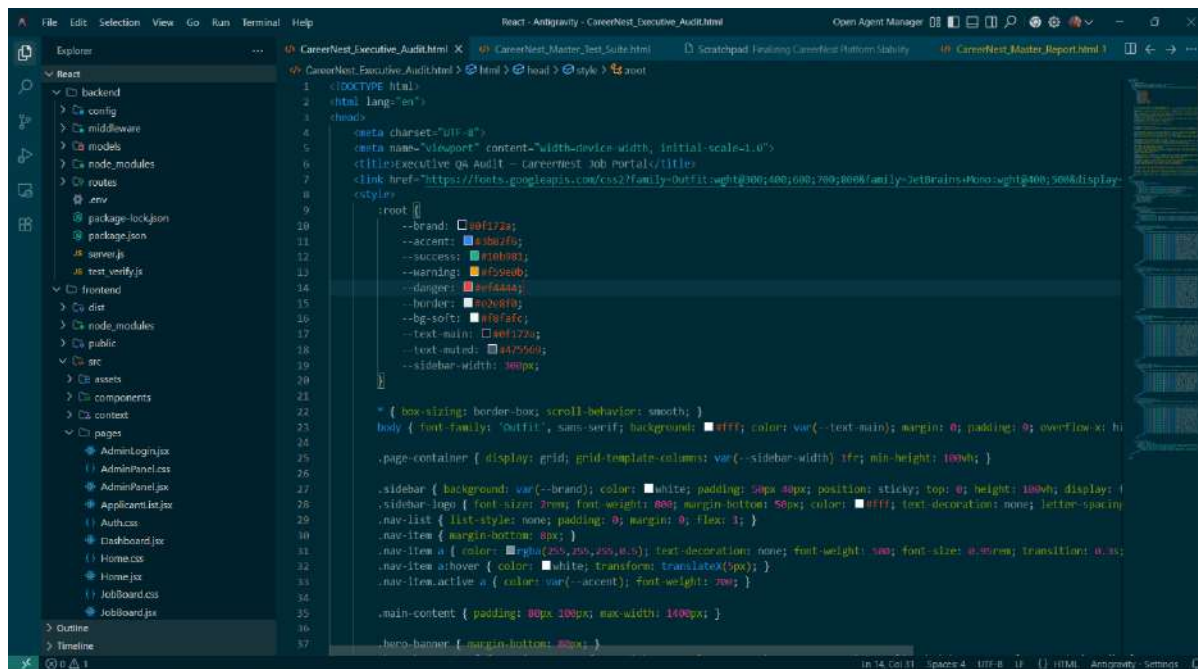

6. System Design

6.1 Architectural Design

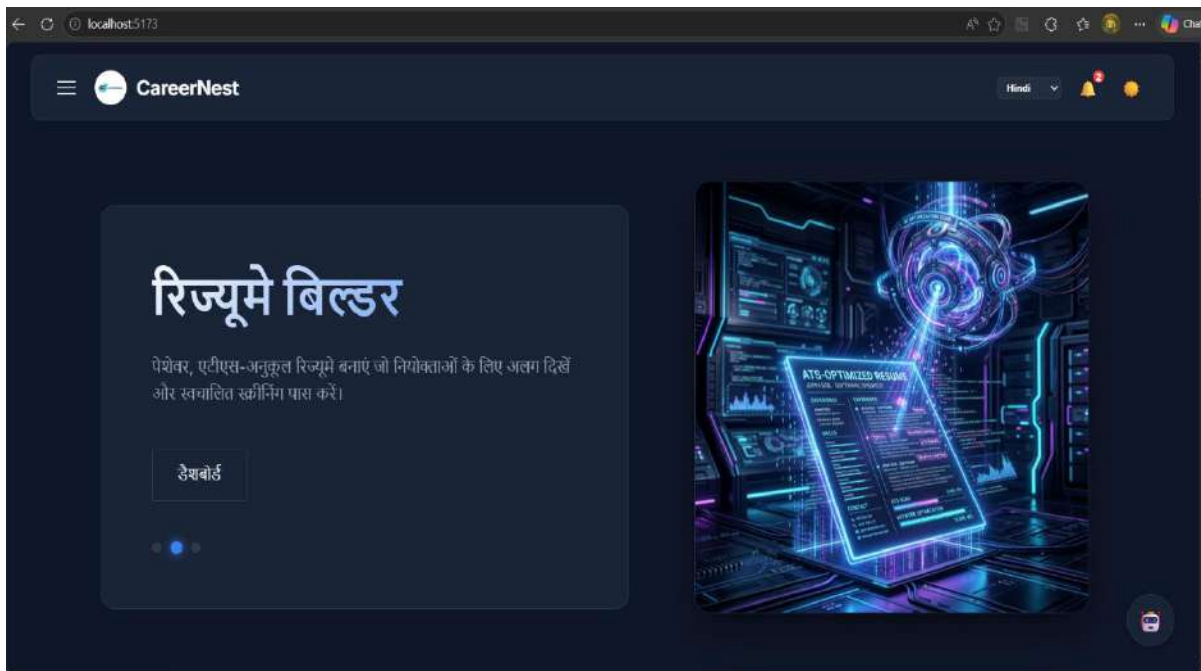

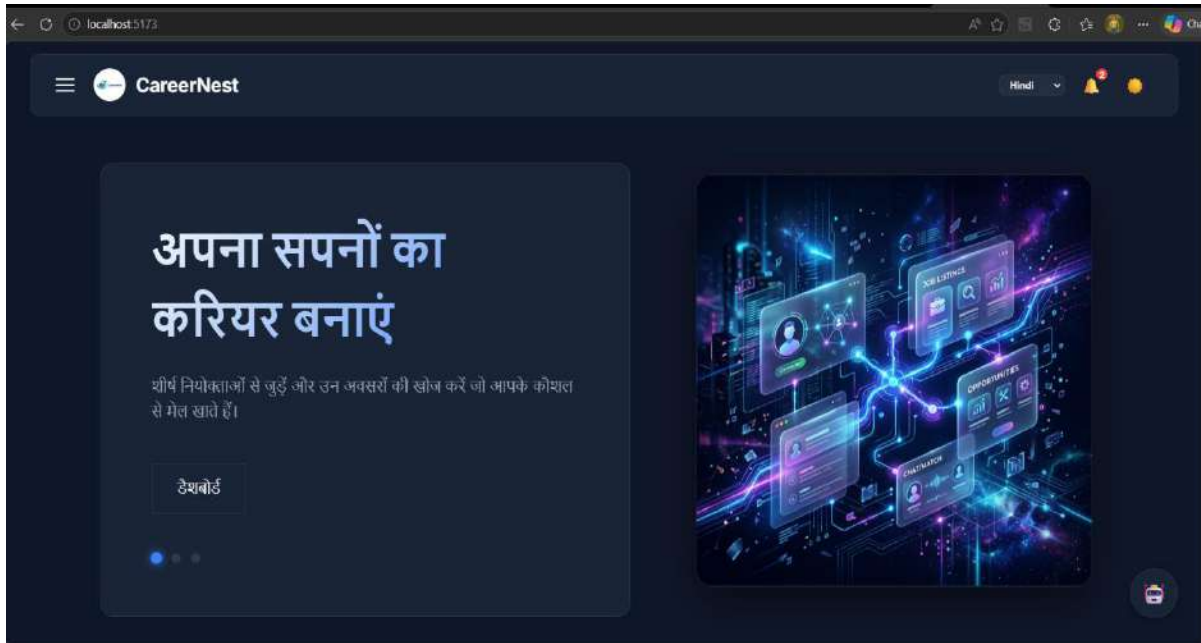

system follows a 3-tier architecture:

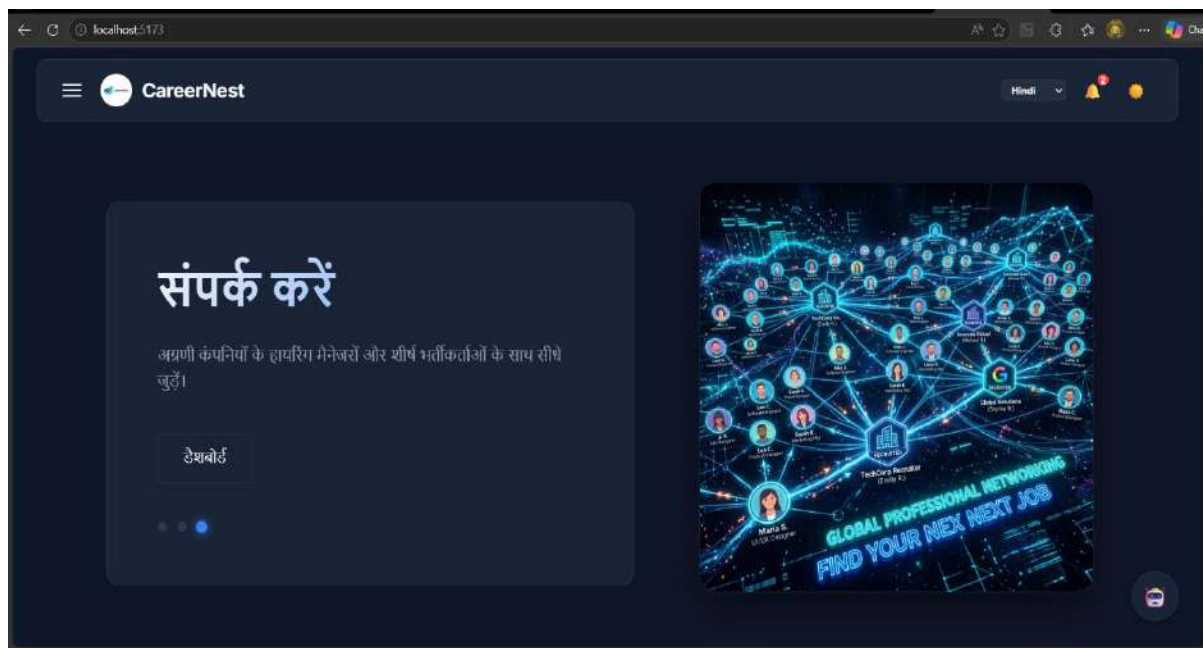

- ✓ Frontend (UI)
- ✓ Backend (Logic)

This separation improves scalability and maintainability.

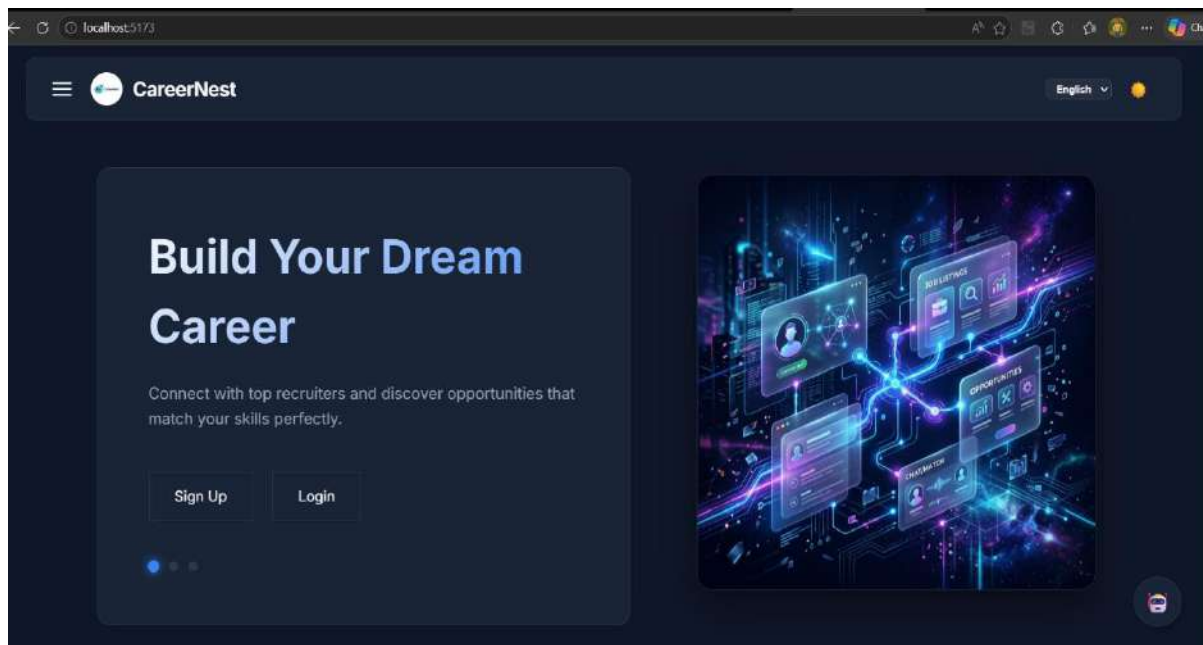

6.2 Interface Design

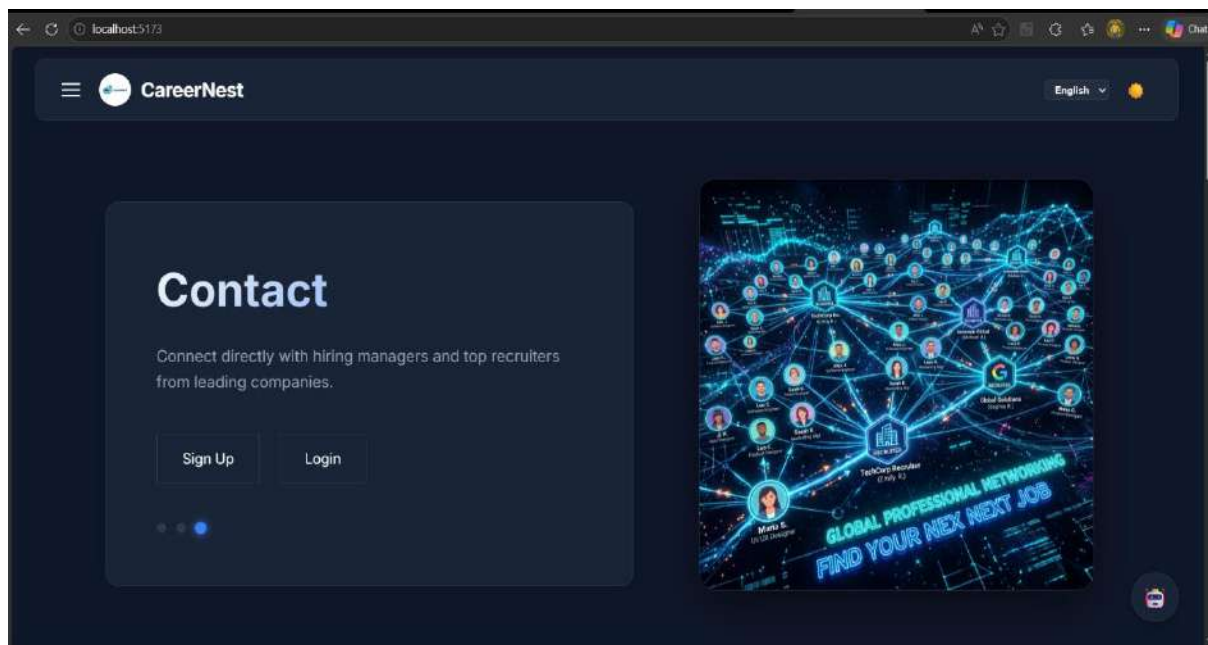

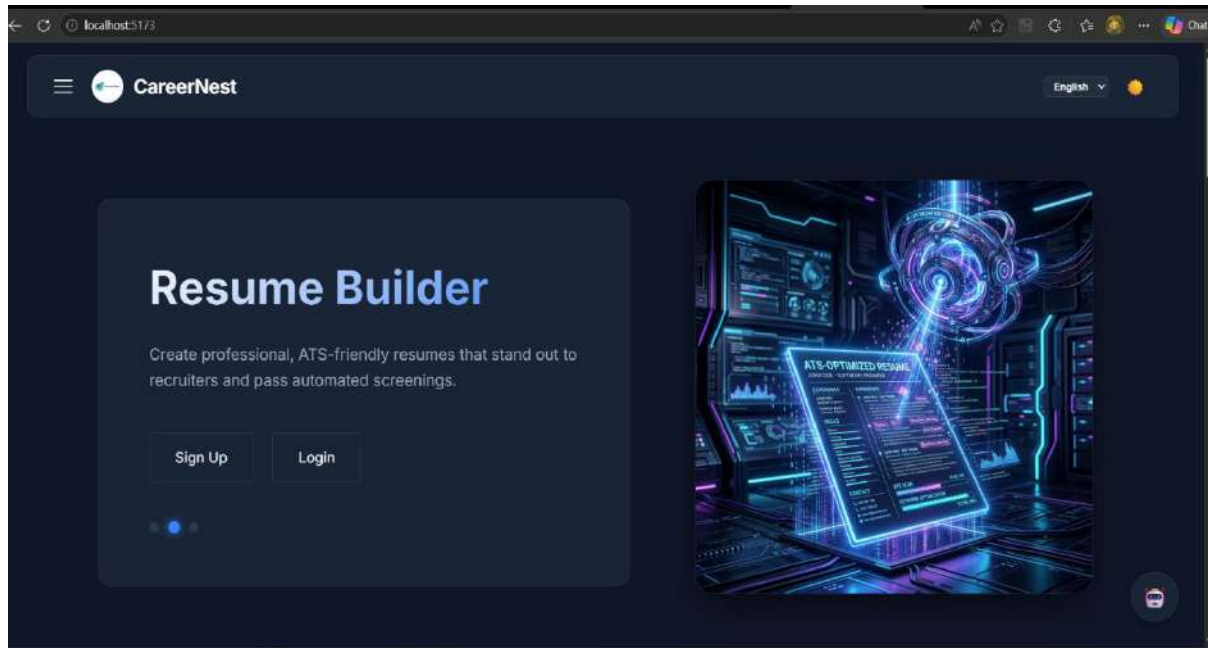

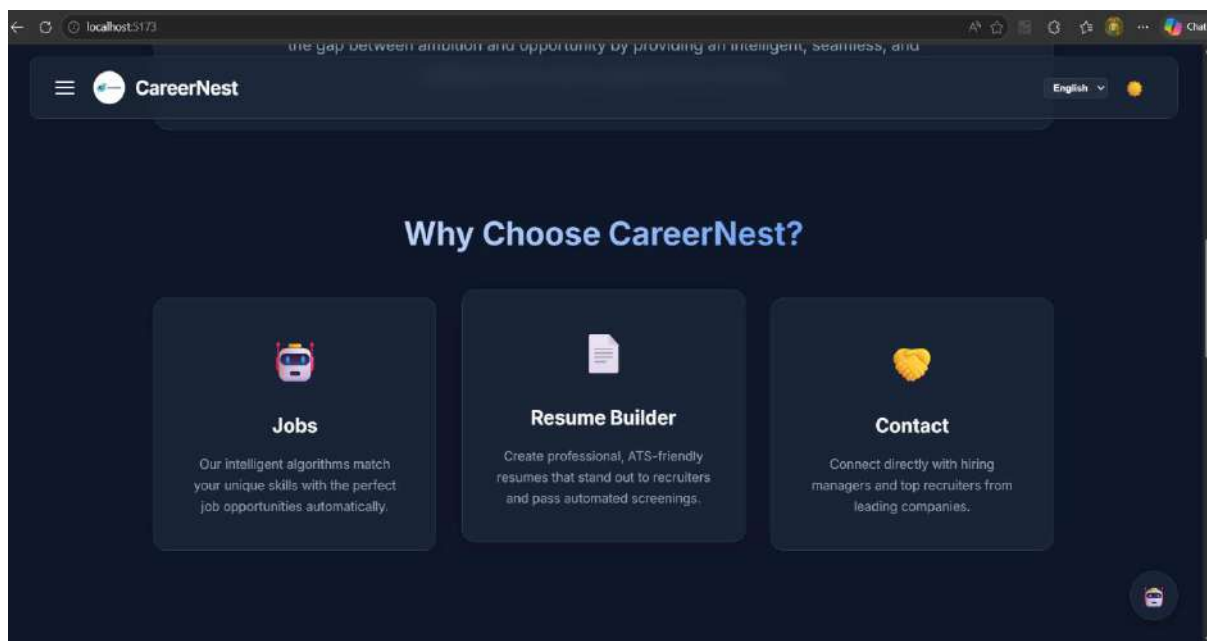

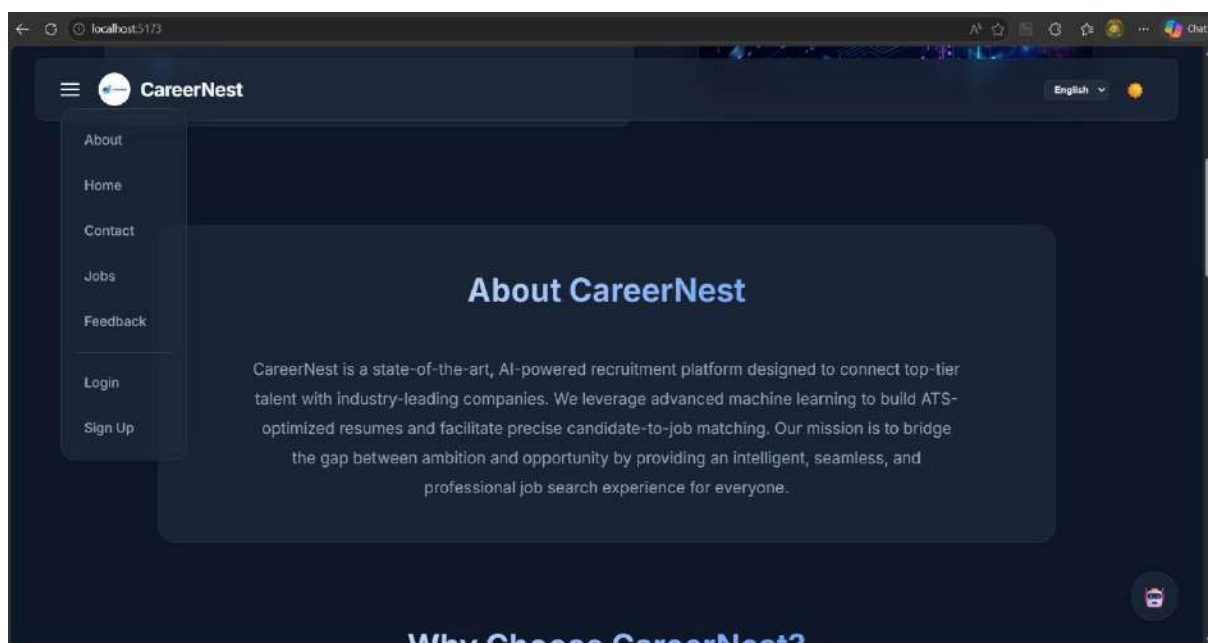

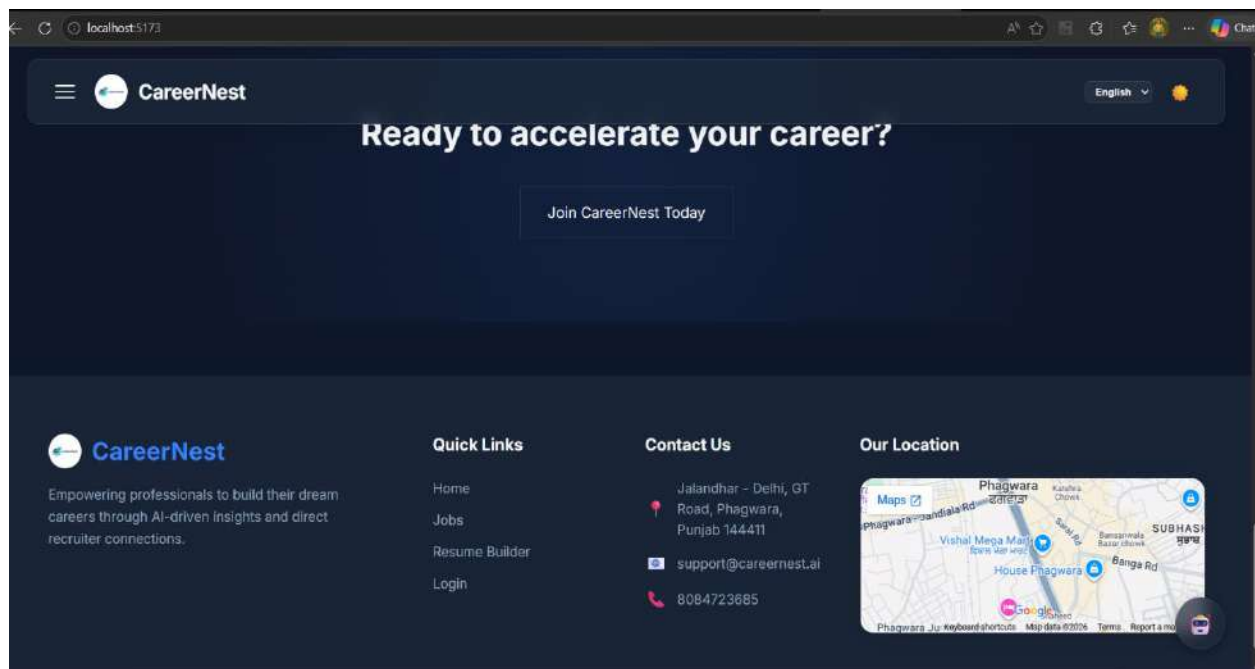

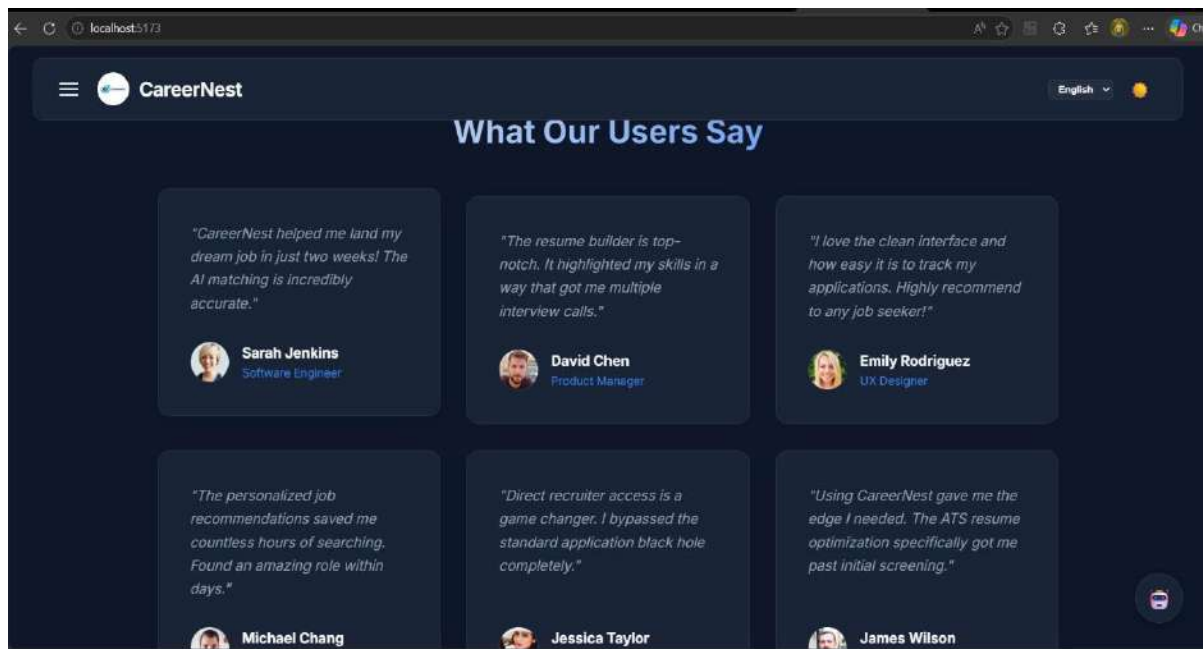

6.2.1 User Interface Design

Simple, responsive, and easy to navigate.

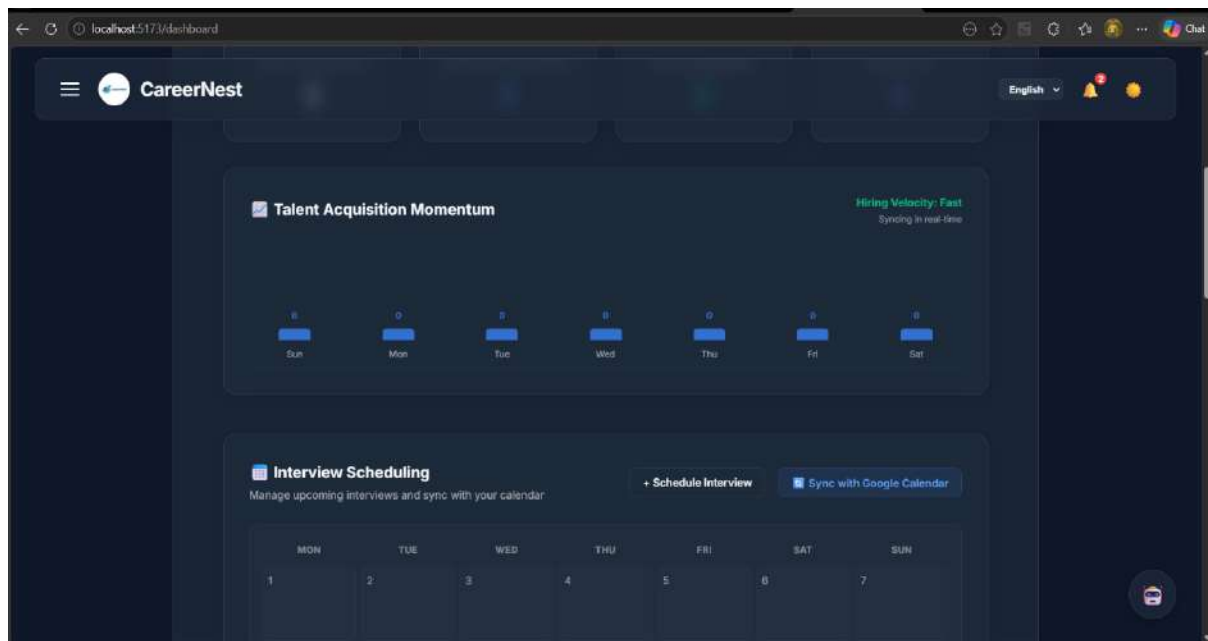

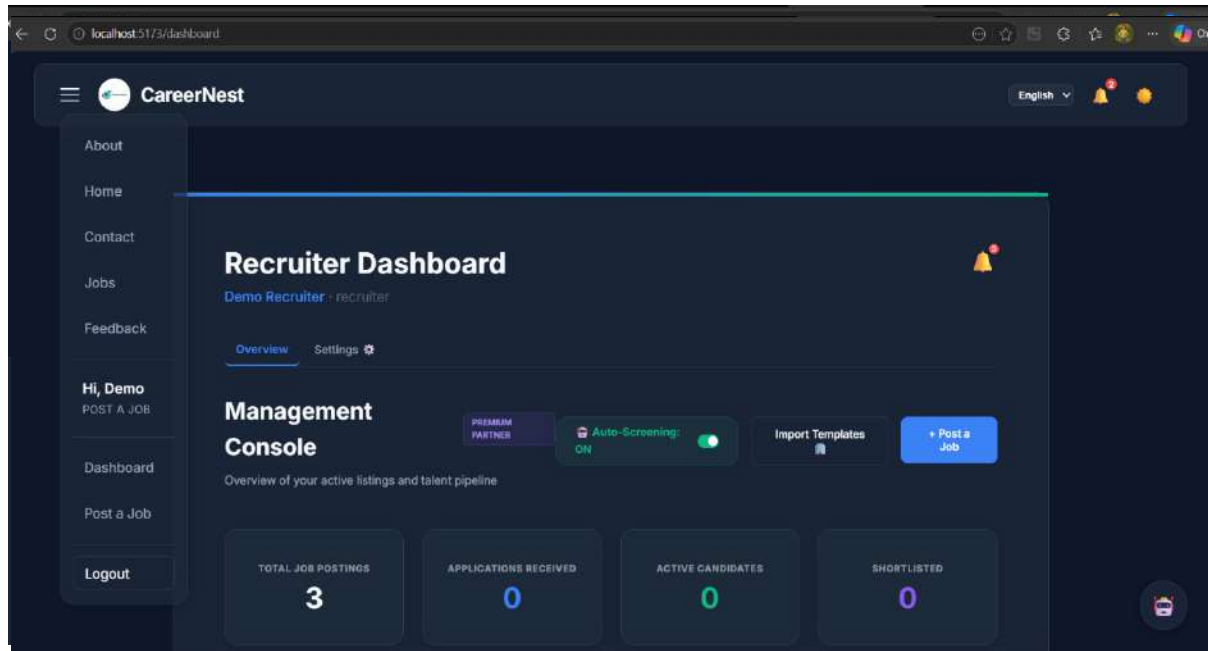

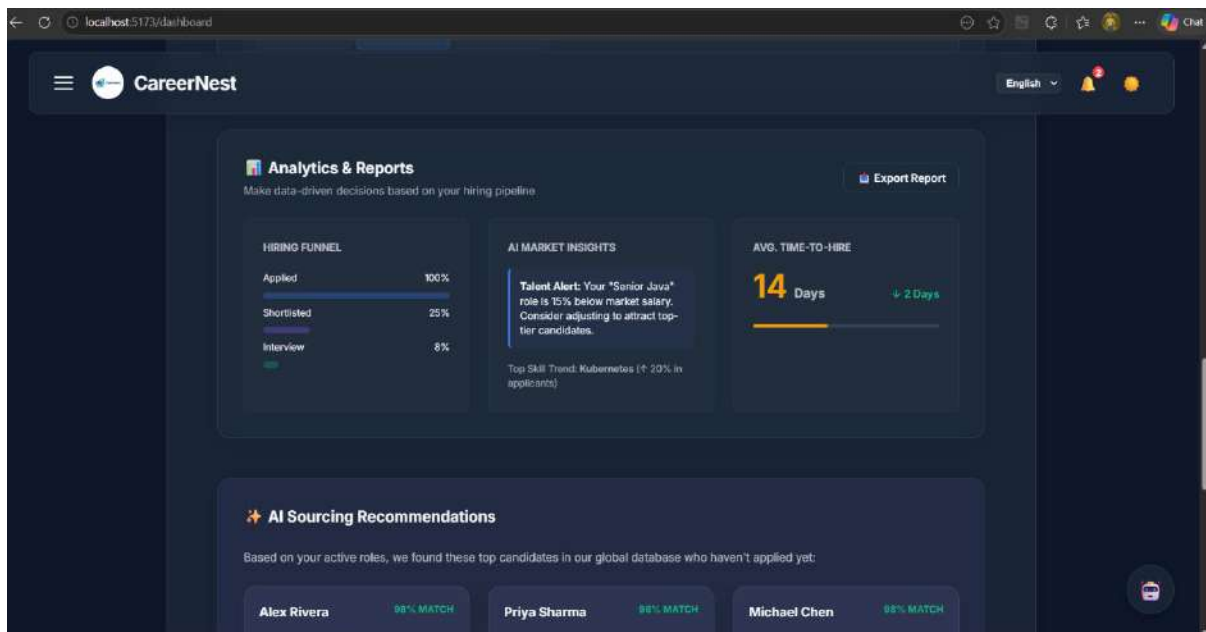

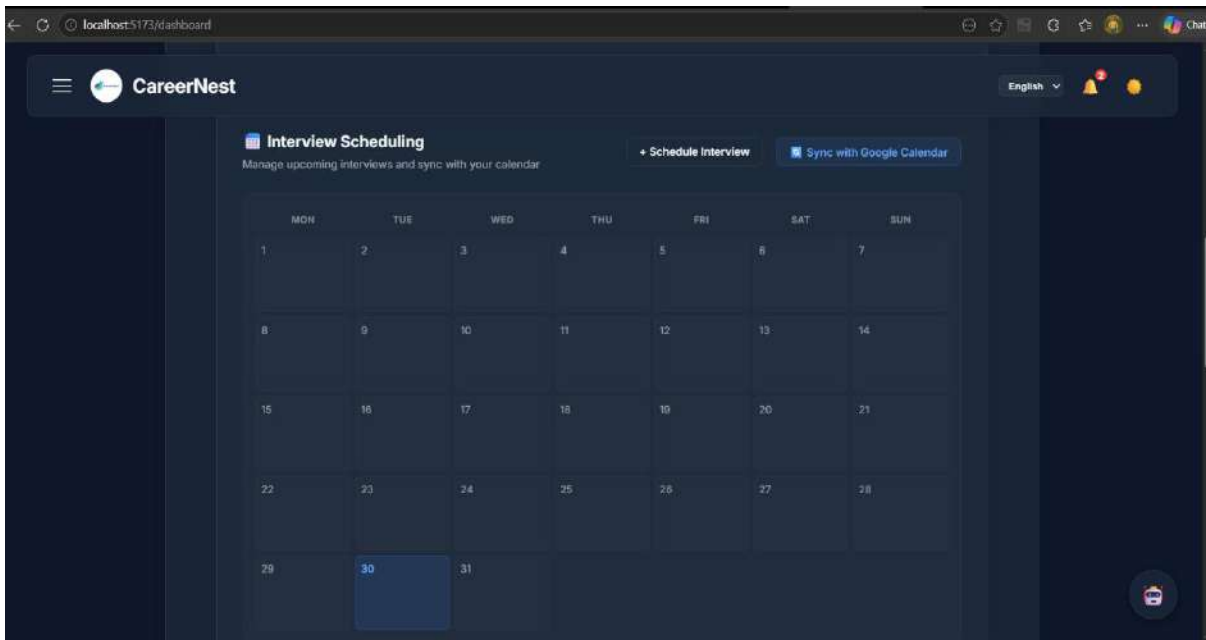

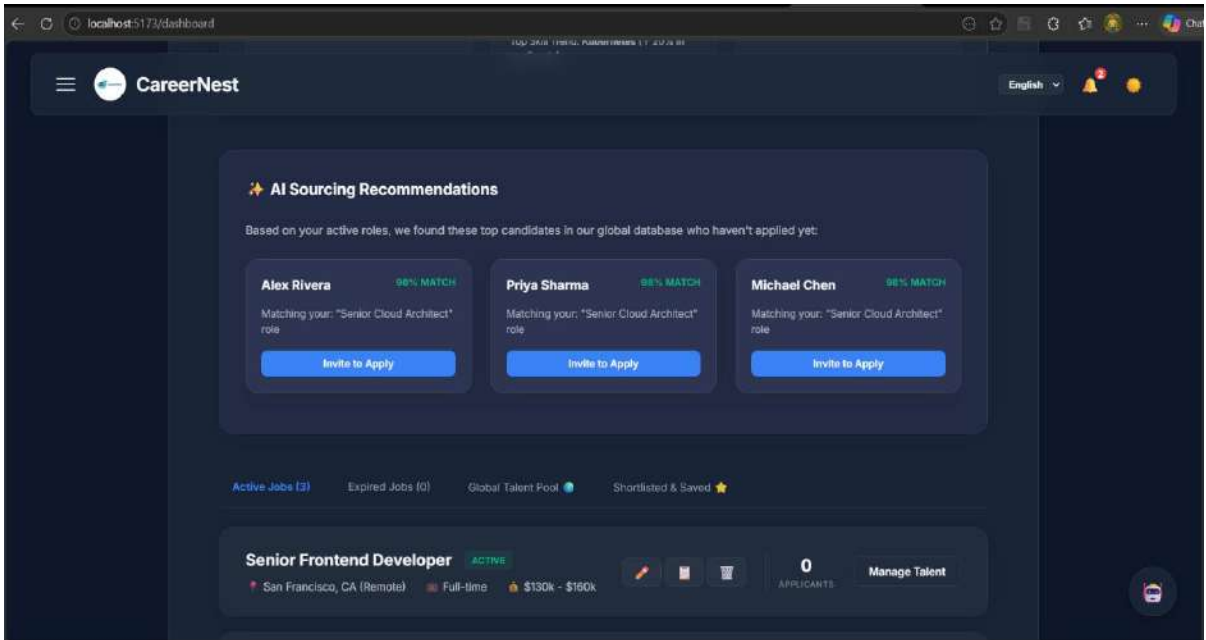

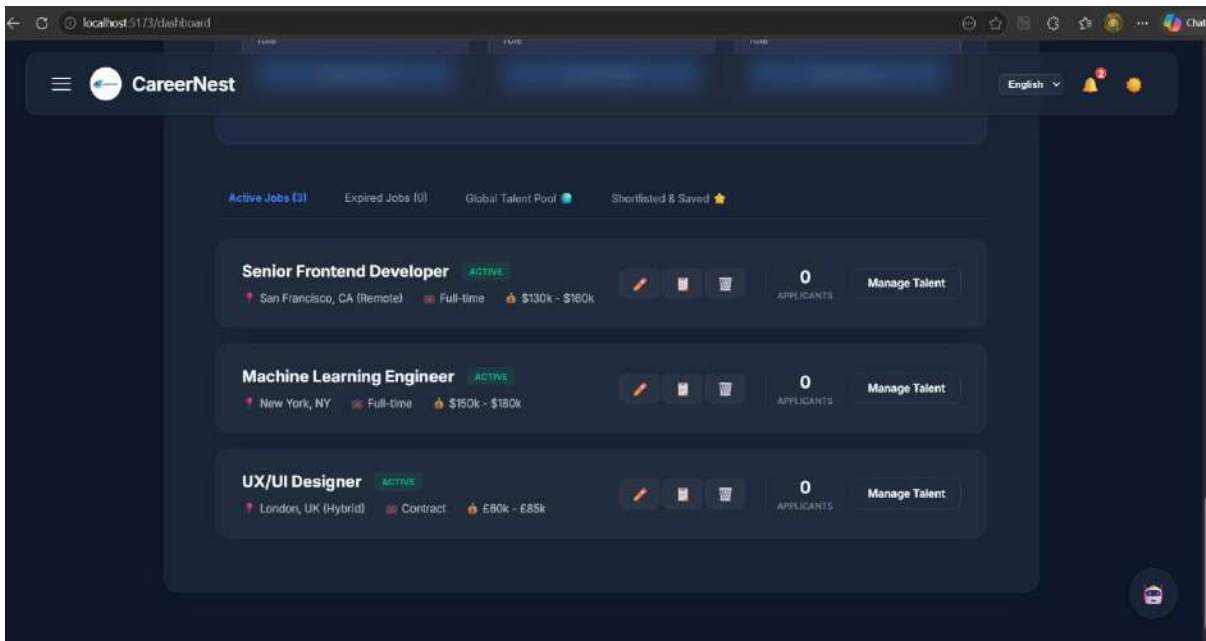

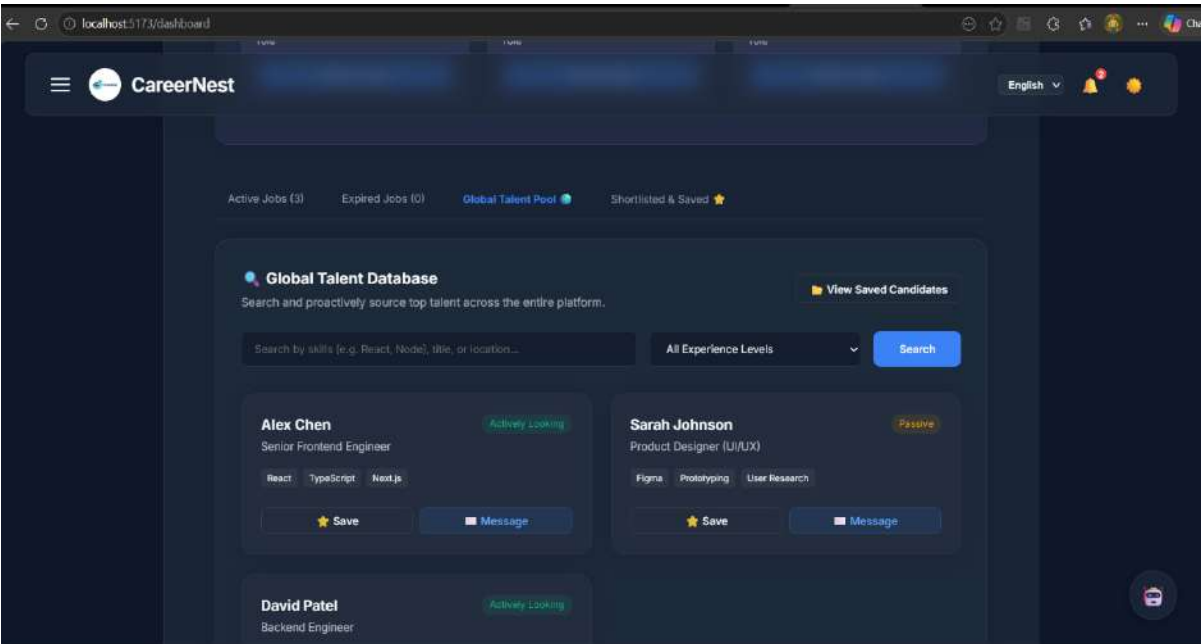

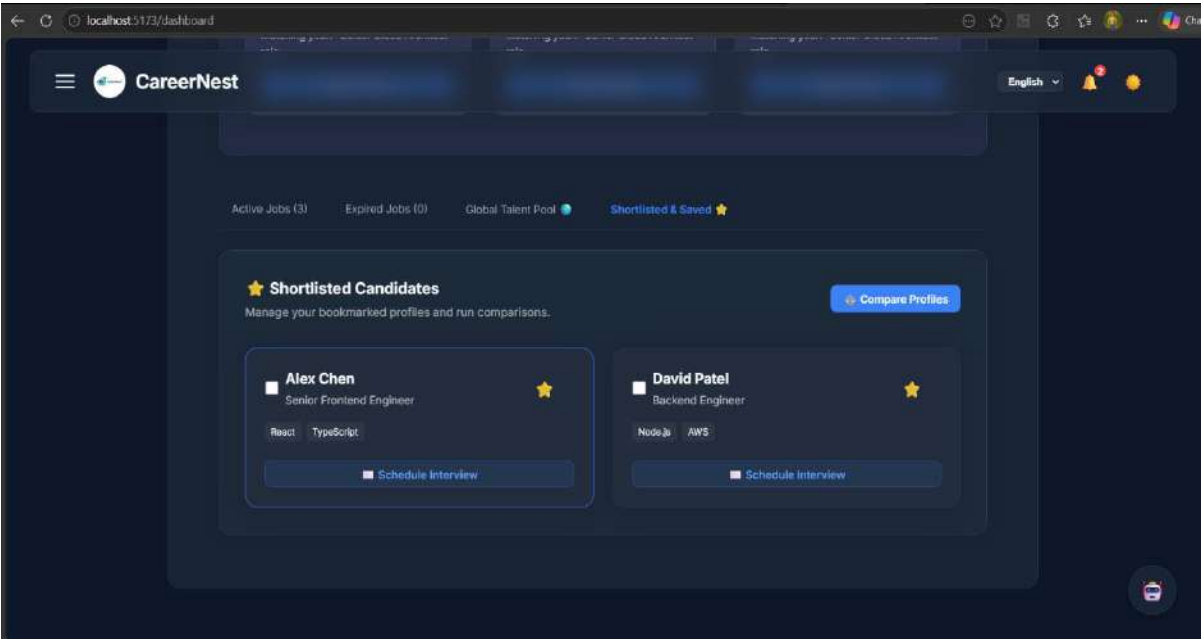

6.2.2 Recruiter Dashboard UI

Displays job postings, applicants, and analytics.

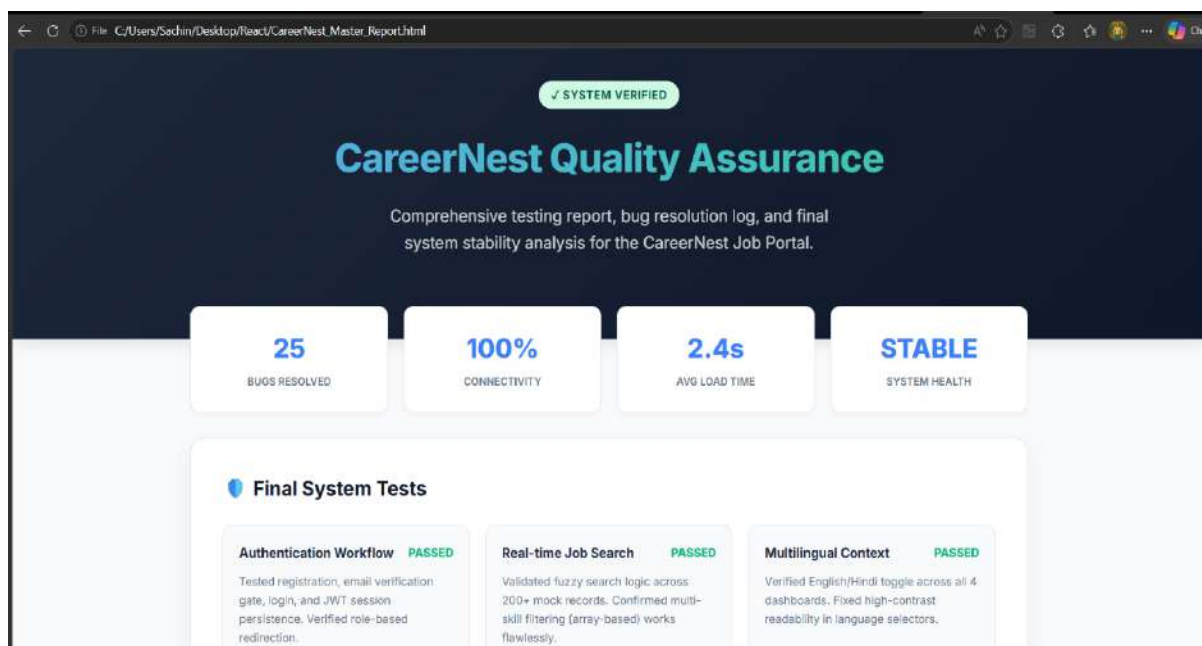

6.2.3 Resume Builder UI

Allows users to create and edit resumes easily.

7. Testing Techniques

Testing ensures system reliability.

- ✓ Unit Testing: Test individual modules
- ✓ Integration Testing: Test combined modules
- ✓ System Testing: Test full system
- ✓ Black Box Testing: Focus on output
- ✓ White Box Testing: Check internal logic
- ✓ Performance Testing: Check speed
- ✓ Security Testing: Check vulnerabilities

Master Bug Resolution Log

ID	COMPONENT	RESOLUTION SUMMARY	SEVERITY	STATUS
BUG-21	Infrastructure	Proxy target set to 127.0.0.1; resolved 502 Bad Gateway errors.	CRITICAL	FIXED
BUG-14	Navigation	Fixed tab bar overflow with horizontal scroll and flex-shrink constraints.	CRITICAL	FIXED
BUG-09	Auth/API	Added role-based guards to prevent seeker 403 errors on recruiter endpoints.	CRITICAL	FIXED
BUG-22	Job Board	Rewrote search logic to handle skill arrays and fuzzy title matching.	HIGH	FIXED
BUG-13	Backend	Updated deprecated Mongoose remove() to deleteOne() for modern MongoDB.	HIGH	FIXED
BUG-16	Dashboard	Implemented missing search interface UI for seeker analytics.	HIGH	FIXED
BUG-23	UI Design	Fixed low-contrast text in Hindi language selector options.	MEDIUM	FIXED
BUG-24	UX Layout	Optimized Auth panel vertical spacing to fit laptop viewports without	MEDIUM	FIXED

Final System Tests

Authentication Workflow

PASSED

Tested registration, email verification gate, login, and JWT session persistence. Verified role-based redirection.

Real-time Job Search

PASSED

Validated fuzzy search logic across 200+ mock records. Confirmed multi-skill filtering (array-based) works flawlessly.

Multilingual Context

PASSED

Verified English/Hindi toggle across all 4 dashboards. Fixed high-contrast readability in language selectors.

Responsive Alignment

PASSED

Tested UI on iPhone 14, iPad Pro, and 1080p Desktop. All grids collapse and expand correctly with 0 horizontal overflow.

Backend Integration

PASSED

Proxy configuration (127.0.0.1) stabilized. Confirmed 0% packet loss between Vite and Express/Mongoose layer.

Navigation Routing

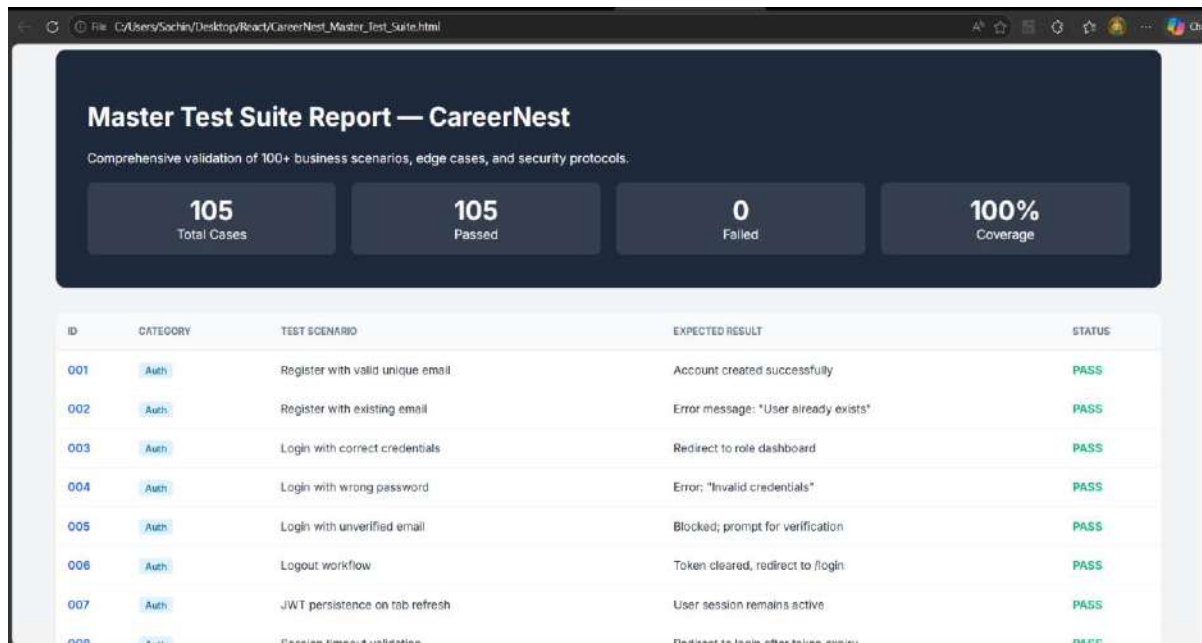

PASSED

Added explicit routes for About/Contact. Confirmed smooth-scroll functionality for deep-linked sections.

Master Bug Resolution Log

ID	COMPONENT	RESOLUTION SUMMARY	SEVERITY	STATUS
----	-----------	--------------------	----------	--------

7.1 Test Cases & Results

ID	CATEGORY	TEST SCENARIO	EXPECTED RESULT	STATUS
001	Auth	Register with valid unique email	Account created successfully	PASS
002	Auth	Register with existing email	Error message: "User already exists"	PASS
003	Auth	Login with correct credentials	Redirect to role dashboard	PASS
004	Auth	Login with wrong password	Error: "Invalid credentials"	PASS
005	Auth	Login with unverified email	Blocked; prompt for verification	PASS
006	Auth	Logout workflow	Token cleared, redirect to /login	PASS
007	Auth	JWT persistence on tab refresh	User session remains active	PASS
008	Auth	Session timeout validation	Redirect to login after token expiry	PASS

```

8.Implementation

8.1Development Environment

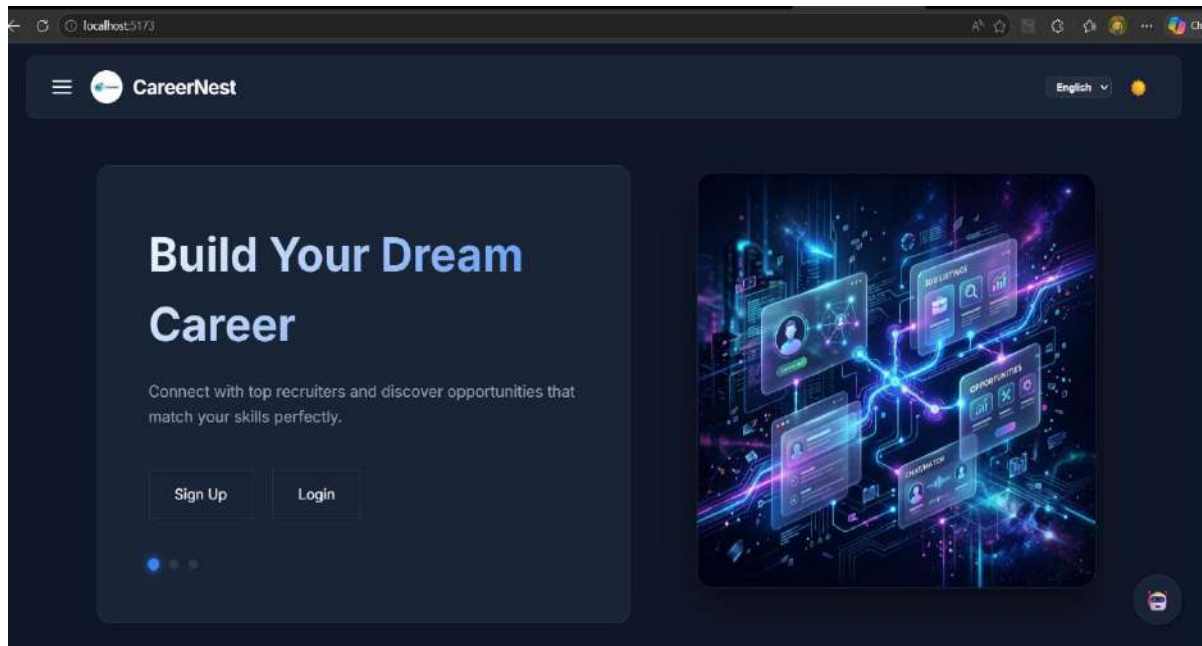

System developed using modern tools and frameworks.

8.2Tools & Technologies Used

- ✓ Frontend: React.js
- ✓ Backend: Node.js
- ✓ Database: MySQL

9. Deployment Strategy

System can be deployed on Local Host.

9.2 Maintenance Plan

Regular updates and bug fixes will be performed.

10. Project Outcomes & Future Scope

10.1 Current Status

System is functional and meets core requirements.

10.2 Future Enhancements

- ✓ Ai resume suggestion
- ✓ Job recommendation system
- ✓ Email notification
- ✓ Chat system between recruiter & candidate

10.3 Learning Outcomes

Gained knowledge in full-stack development and system design.

11. User Manual

11.1 User Registration Guide

Users can register using email and password.

The image displays two screenshots of the CareerNest web application's registration process. The top screenshot shows the 'Create Account' form, which includes fields for Full Name, Email Address, Password, I want to... (Find a Job), Phone Number, and Location. The bottom screenshot shows the 'Find a Job' form, which includes fields for Phone Number, Location, a CAPTCHA verification code, and a checkbox for agreeing to the Privacy Policy and Terms & Conditions, followed by a 'Sign Up' button and a link for existing users.

11.2 Resume Builder Usage

Users can create and download resumes.

The screenshot shows a web browser window with the URL `localhost:5173/resume-builder`. The page has a dark blue theme. At the top, there is a navigation bar with the 'CareerNest' logo on the left and a language dropdown set to 'English' on the right. The main heading is 'Ultimate CV Architect' with the subtitle 'Comprehensive, industry-standard CV builder with all essential sections.' Below this, the 'Contact Information' section is active, indicated by a red document icon and the text 'Contact Information'. It contains four input fields: 'FULL NAME *' with the value 'John Doe', 'EMAIL ADDRESS *' with the value 'john@example.com', 'PHONE NUMBER' with the value '+1 234 567 890', and 'LINKEDIN URL' which is empty. Below the contact section, the 'Professional Summary *' section is partially visible, showing a red document icon and the text 'Professional Summary *'. A circular profile picture placeholder is visible in the bottom right corner.

The screenshot shows the same web browser window, but now the 'Professional Experience' section is active, indicated by a red document icon and the text 'Professional Experience'. Above this section, the 'Professional Summary *' section is collapsed, showing only its header. The 'Professional Experience' section includes a '+ Add Experience' button and a form with three input fields: 'Title' with the value 'Software Engineer', 'Company' with the value 'Tech Corp', and 'Duration (e.g. 2021 - Present)' with the value '2021 - Present'. Below these is a larger text area for 'Description...' which is currently empty. The same navigation bar and profile picture placeholder are visible as in the previous screenshot.
